What does **HTML Comments: How To Use Them In Your HTML Code** do?

This element is used to add a comment to an HTML document. An HTML comment begins with `<!--` and the comment closes with `-->`. HTML comments are visible to anyone that views the page source code, but are not rendered when the HTML document is rendered by a browser.

You can even comment out things in `<!-- the middle of -->` a sentence.

`<!--`

Or you can

comment out

a large number of lines.

`-->`

`<div class="example-class">`

Another thing you can do is put comments after closing tags, to help you find where a particular element ends. `
`

(This can be helpful if you have a lot of nested elements.)

`</div> <!-- /.example-class -->`
