How to disable spell checking from Input Box and Textarea in HTML forms

Topic: HTML / CSS   « Prev|Next

Answer: Set the attribute spellcheck="false"

If you enter the grammatically incorrect words inside `<input>` or `<textarea>` fileds in an HTML form you will see the red underline below the incorrect words.

This is the default behavior of Chrome and Firefox. However if you are using the input fields or text areas for editing the code or other non-prose data spell checker would not appropriate. In such situation you can disable this spell checking in HTML forms by setting the `spellcheck` attribute to `false`, like `spellcheck="false"`.

Example	Try this code »

```
01.  <!DOCTYPE html>
02.  <html lang="en">
03.  <head>
04.  <meta charset="UTF-8">
05.  <title>Disable Spell Checking</title>
06.  </head>
07.  <body>
08.      <form>
09.          <p>
10.              <input type="text" spellcheck="false">
11.          </p>
12.          <p>
13.              <textarea spellcheck="false"></textarea>
```

```
14.              </p>
15.              <button type="reset">Reset</button>
16.         </form>
17.     </body>
18.  </html>
```

💡 **Tip:** To disable the spell checking in the entire form at once — just set the
`spellcheck="false"` in the `<form>` tag, like `<form spellcheck="false">`.
